J.R. Dempsey reshoot	309 (40)	29.36 (6)	73.47 (4)	60.44 (7)	78.51 (10)	67.22 (13)

Thanks to those who came out in marginal weather to shoot this month.

For newcomers – explanation of scoring

The first number under each stage is your total time for the stage. This is calculated by adding your raw time, plus additional time for points down and penalties. In the parenthesis is the number of points down for each stage. These are converted to seconds. Each point is worth a half a second. If you got a procedural (often given for shooting targets out of order) 3 seconds was added to your raw time. For other penalties see the rulebook.
